Garage System User Manual

Thank you for using the garage system application. You can read this manual to fully understand the functions that the application provides to make you more comfortable.

Contents

1) The Main Functionalities

There are many functions the application provides to make for the easiness of the entrance and departure of the cars avoiding the crowding and the collision.

1.1) **The Prices Information:** The application gives you information about the prices of parking in different cases as it provides the price of spending only 1 minute till spending a full day.

1.2) **Handicapped Option:** The application takes care of handicapped persons and provides them special places which are closer to the doors.

1.3) **Mapping the Availability of the spots:** You can see all the spots and where there are located and choose the most suitable spot by confirmation then you can enter that spot.

1.4) **Departure Function:** You will be provided by all needed information as your name, spot's number, entrance time, duration and the fees of the service

2) The Main Screen:

When you open the application, you will see the below screen which is provided by the fare rate and there are two main functions you have to choose between them either (Car Enter) if you will park and searching for spots or choose (Car Leave) if you will leave the garage.
